Content	<p>This course must be taken by students after taking a minimum of 90 credits, carried out for 1 (one) month. This course aims to teach students about the world of the field to be able to apply the theory that has been obtained during college and know how to apply it outside the campus. This course provides provisions for students to work in the field (project) according to their field of interest. Students can directly observe the implementation of project work and can also play a role in doing some project work. Students are able to make a report on the implementation of project work during the field work and present it at the examination.</p>
Exams and assessment formats	<i>Project and report</i>
